

**FOR IMMEDIATE RELEASE**

**Cardinal Systems offers new VERSA BRACE deck support**

Cardinal Pool Systems has a new deck support system they call the 'Versa Brace.' This versatile system can be installed anywhere along any panel of the pool—on any radius or any straight panel—and can be placed as close or as far apart as needed. The Versa Brace attaches to the panel top using 2 self-tapping screws and no fastener is required to attach at the bottom of the panel—no more bending-over or tightening bolts in the mud! The Versa Brace channel construction is stronger than angle construction and rests on the top of the support channel so it doesn't rely on the strength of the bolt—for guaranteed support of pool perimeter decks. One piece version now available for both 42" and 48" walls. For more information and pricing call 888-785-6464 or contact [info@poolsbycardinal.com](mailto:info@poolsbycardinal.com).
